

Siavash Mohammadjani

Midlevel Front end Developer

+989309375878 | siavashmjys@gmail.com | Tehran

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Midlevel Front-End Developer with hands-on experience building responsive, component-based web interfaces using HTML, CSS, JavaScript, TypeScript, React, and Next.js. Familiar with modern front-end development practices including responsive design, API integration, performance optimization, lazy loading, code splitting, accessibility, testing, and reusable component architecture. Comfortable working with Git-based development workflows, REST APIs, Postman, and collaborative development environments. Strong problem-solving and critical-thinking skills with a continuous-learning mindset and a strong interest in building scalable, user-focused web applications.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python (Basic)

Frontend Development: React.js, Next.js, Tailwind CSS, Bootstrap 5, Responsive Web Design, Component-Based Design,

React Hooks, Reusable UI Components

Web Performance: Lazy Loading, Code Splitting, Performance Optimization, Image Optimization, Core Web Vitals

APIs & Data: REST APIs, JSON, OpenAPI, Postman, API Integration

Development Tools & Workflow: Git, GitHub, GitLab, npm, ESLint, Prettier, Pull Requests, Version Control

UI & Web Standards: Accessibility, WCAG Fundamentals, Semantic HTML, Responsive Design

WORK EXPERIENCE

Lexa

May 2024 – Present

Mid Front-End Developer (remote)

- Developed responsive and user-friendly web interfaces using HTML, CSS, JavaScript, TypeScript, React, and Next.js.
- Built reusable and maintainable UI components using component-based development principles.
- Implemented responsive layouts using Tailwind CSS across desktop, tablet, and mobile devices.
- Integrated REST APIs and third-party services using Postman and OpenAPI documentation.
- Improved application performance through lazy loading, code splitting, optimized rendering, and efficient asset loading.
- Worked with Git, GitHub, and GitLab for version control, collaborative development, branching, and code management.

TCM Group

Jul 2022 – Apr 2024

Front-End Developer / Developer Intern (remote)

- Developed and maintained responsive frontend components for web applications.

- Converted UI designs into reusable React and Next.js components.
- Implemented frontend functionality using JavaScript and TypeScript.
- Connected frontend applications to REST APIs and handled API responses and application states.
- Used Git-based workflows to manage source code and collaborate with team members.
- Identified and resolved UI, functionality, and cross-browser issues.
- Worked closely with team members to deliver features according to project requirements.
- Contributed to improving application performance, code organization, and overall user experience.
